

UTAH WILL MEET CALIFORNIANS

Play at Los Angeles
New Year's Day.

University of California Offers \$1000 for the Game.

Maddock's Men Will Begin Practice
This Afternoon—The Men Are in Good Shape.

"Will give your team \$1000 to play the University of Southern California at Los Angeles New Year's."

The above telegram was received yesterday afternoon by Capt. Jimmie Wade of the "U" eleven from Harvey Holmes, coach of the U. S. C. aggregation. The message was hailed with delight by the members of the Varsity team, for it assures a trip to the coast. Last evening, after consulting with Coach Maddock, Capt. Wade wired acceptance of the terms and conditions will be forwarded at once.

Californians Are Strong.
The University of Southern California football team is an unusually strong aggregation this year. The team made a creditable showing against Stanford and won the undisputed championship of the southern part of the Golden State.

Maddock's men are delighted at the prospect of a trip to the coast. They are all in good condition and with two weeks' practice ought to be able to give the Californians a vigorous run for the money.

The game will be of unusual interest in this city because of the fact that the California team has been coached this season by Harvey Holmes, who for three years was at the head of the athletic department of the University of Utah. Under the direction of Holmes the Varsity was unable to put out a first-class football team and the contest at Los Angeles will show whether it was because of his inability to teach football.

Begin Practice Today.
The "U" gridiron gladiators will don their uniforms this afternoon and begin practice for the New Year's game. They expect to win it, but realize that the Californians are a strong aggregation.

While in California the Utah team may play the Pomona college eleven. The latter team wants a game badly and they will probably be taken on.

Imperials Defeat Jersey Blues.
In a spirited game of football played yesterday at Calder's, the Imperials defeated the Jersey Blues by a score of 5 to 0. Lineup of the Imperials: Peck, right guard; Henderson, left guard; Reed, right tackle; Fawcett, left tackle; McDonald, right end; Taylor, left end; Herman, quarterback; McKenzie, halfback; Williams, rightback; Sidaway, fullback.

Merit Tells.
At the banquet given to the President in St. Louis, Pomery was selected and served exclusively from among all the other brands of champagne, again demonstrating the fact that Pomery is the standard for champagne quality.

There's a Satisfaction
When that perfect work is returned to you; it's yours for the call.
TROY LAUNDRY.
"The Laundry of Quality."

An Old Salt's Observations.
"There's a lot of difference between havin' good habits an' havin' the habit of bein' good."
"Some folks are so impractical," says Jones to me. "There was the fellow who tried to reach the summit of Mount Blanc by takin' the New York price of meat to Switzerland an' climbin' up on that."
"Did they reach the summit?" I inquired.
"Oh, no," says he, "because, as they stood upon the summit of the price the salt of the mountain was so far below that they didn't dare to jump."
"Woman," says a man to me, "was give to make a man's job complete. 'What makes you say so?' asks 'Why,' says he, 'my wife told me that her woman's club had adopted a resolution sayin' that half of the drink among the men of the tenements was caused by the fact that their food at home was poorly cooked.'"
"Where did they adopt this resolution?" I inquired.
"At the meeting of the club," he replied. "Where was it held?" I asked.
"At the Waldorf-Astoria," she says.
"Why, the hotel chefs, of course," says she. "Oh, I says."

These folks that tell you how to choose a wife are real helpful in the line of it. I went to one. "Shall I choose a thin partner for my life?" I asks. "Thin ones, like enough, will be happy," says the sage. "How about a nice, fat wife?" I asks. "Fat ones are frivolous," he says. "Well, then, the thing for me to do is to find some nice girl about middle fat, ain't it?" I inquires, feelin' real comfortable because at last I'd struck it. "Look out for such a woman," says the expert. "For, will beat you, makin' home a muscle town." "That don't leave no kind of woman I can marry an' be happy with," I says, complainin'. "It seems that way," replies the prophet, holdin' out one hand an' addin', "One dollar, please."—Judge.

The English Eat Rabbits.
One of the most interesting items in connection with the meat imports to England is that of dead rabbits. In England rabbits are an article of food of much greater extent than in the United States. Rabbits are cheap and are considered to be both nutritious and digestible. They are a standard article of food among the people. In 1932 23,223,240 pounds of rabbits of a value of \$1,642,767, were imported into England. Australia alone this last year sent to the value of \$1,248,000. In a lecture recently delivered by one of the commercial agents of Australia it was stated that the great Australian port of rabbits has been alleviated in some extent owing to the fact that it was possible to ship them to England.

Tutt's Pills
FOR TORPID LIVER.
A torpid liver deranges the whole system, and produces
SICK HEADACHE,
Dyspepsia, Costiveness, Rheumatism, Sallow Skin and Piles.
There is no better remedy for these common diseases than DR. TUTT'S LIVER PILLS, and trial will prove like No Substitute.

WELSH RAREBIT WAS POPULAR

Tribute to Cyclist
Jimmy Michael.

Diminutive Speed Merchant
Who Died Last Week
Was Great Rider.

Cleared More Than \$100,000 in the
Racing Game, but Was Penniless When He Died.

Cycle racing sustained its greatest loss last week when Jimmy Michael died on the French steamer La Savole while en route to this country. He died the second day out from Havre from congestion of the brain, the result of a fall at Berlin more than a year ago. In accordance with a cable from his mother in Wales, the body was buried in Greenwood cemetery by P. T. Powers, the manager of the day bicycle race in New York. The lad was undoubtedly one of the most interesting characters in the modern world of sport.

Although less than five feet in height Michael was without a peer when in condition at his specialty of middle distance cycle riding behind pacing machines. None of the cyclists who, from time to time, disputed his title to championship honors, and tried to prove their contention, succeeded when the diminutive pace follower was in any kind of shape. The "Welsh Rarebit," although only 27 years of age, was said to have cleared over \$100,000 at the racing game, but he died penniless. He held many records, which will probably stand for a long time, unless some new mode of pace following is invented.

Born in Wales in 1877 of poor parents, Michael turned to the trade of butcher and was an errand boy for the biggest meat establishment in his home town. While working in that capacity he saved enough to buy a wheel, and almost from the start, while competing in amateur events, he showed that stamina and speed which afterward made him world famous. The contest was witnessed by Warburton, the famous English trainer, who saw a chance of making money by taking the boy under his wing. After proving himself as good as any rider in Great Britain, Germany and France, Michael was brought to this country just at the time when cycle racing was at fever heat and one of the most popular pastimes. Tom Eck, who has handled more successful cyclists than any other man in this country, took Michael in charge, but later he himself as good as any rider in Great Britain, Germany and France, Michael was brought to this country just at the time when cycle racing was at fever heat and one of the most popular pastimes. Tom Eck, who has handled more successful cyclists than any other man in this country, took Michael in charge, but later he himself as good as any rider in Great Britain, Germany and France, Michael was brought to this country just at the time when cycle racing was at fever heat and one of the most popular pastimes. Tom Eck, who has handled more successful cyclists than any other man in this country, took Michael in charge, but later he himself as good as any rider in Great Britain, Germany and France, Michael was brought to this country just at the time when cycle racing was at fever heat and one of the most popular pastimes.

his own troubles in keeping Jimmy at the training table.
His gentle habits soon made him a big favorite in the cycle world. While in a contest Michael would appear to be doing anything but undergoing a severe physical test. He wore an expressionless countenance, and if he was beating an opponent by inches no one could tell it by looking at his face. He was also very queer in that after winning a big race and making several thousand dollars, he would seldom ride around the track again to receive the plaudits of the admirers. He would dismount, put on his street clothes and walk away as if nothing unusual had occurred. As a pacer rider Michael was the most graceful cyclist that ever bestrode a wheel. His bicycles were always built to fit him and generally looked like toy wheels. When changing pace he was never known to be disturbed. He seemed to glide to the machine as if a string was attached to his wheel. He always rode a high geared wheel and never used anything but his legs in riding. There was no movement of the head, shoulders or hips. As a pacer rider Michael was the most graceful cyclist that ever bestrode a wheel.
